

# IMPLANT HORIZON

## **DESCRIPTION:**

The surgical workshop highlights on the basis of oral implantology for the budding dentists. The participants had the opportunity of placing implants on the goat jaw model mounted on a novel simulation clamp that mimics the patient position and on live patients. Lectures were given by the staff of various departments which included topics from case selection to peri implant care. Hands on workshop was held on both days- on the goat jaw model and on live patient on the successive days. The armamentarium for the implant placement were provided to the participants by the department. Finally, participants were felicitated with certificates.
