

## **CBCT PROGRAM FOR INTERNS**

On 29th November, 2024, the Department of Oral Medicine and Radiology at Karpaga Vinayaga Institute of Dental Science conducted a CBCT program for general practitioners. The program aimed to educate participants on the principles, applications, and benefits of Cone Beam Computed Tomography (CBCT) in dental diagnosis and treatment planning. Expert faculty members shared their knowledge and experience, highlighting the advantages of CBCT in various dental specialties, including oral surgery, orthodontics, and endodontics. The program was interactive, with hands-on training and case discussions, enabling participants to enhance their skills and integrate CBCT into their clinical practice.
